Blazer™ Dx-20 Catheter – Intuitively engineered for exceptional performance.

Performance always matters.

The Blazer Dx-20 Catheter raises the bar on diagnostic catheter performance.

Intuitively engineered construction combined with our trusted Blazer Catheter platform provide a diagnostic catheter designed to function as a physical extension of your hand.

Manipulation of the handle translates predictably into movement of the catheter tip. Control and durability provide the confidence of precise tip placement.

Bidirectional Duodecapolar Diagnostic Catheter on the Blazer Catheter Platform

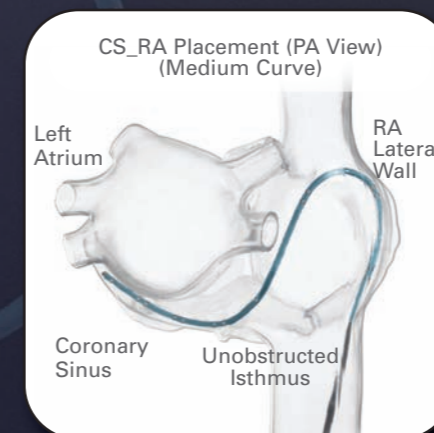

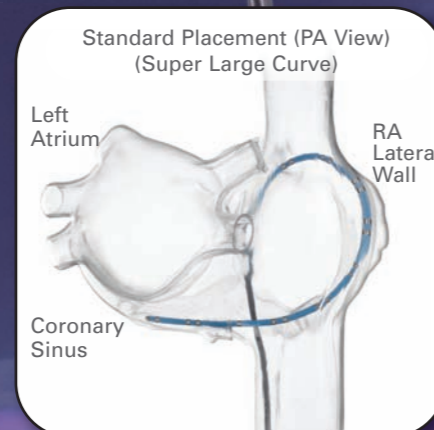

- bidirectional steering for easy CS access and advancement
- backsteering helps secure position in the CS
- curve-lock helps stabilize tip; creates stable reference point
- excellent torque response designed to provide predictable handling

Alternative CS_RA Placement

- leaves the isthmus area unobstructed
- reduces the number of diagnostic catheters required

Soft, Extended Distal Tip

- designed to lower the risk of vessel injury
- conforms to anatomy providing good electrode contact

Feel the difference.
